CONTRACTS SERVICE

S.V.I. supplies kits and equipment for utilities to carry out their own operations. In addition, our Contracts Services Team carries out the flowstopping of very large diameter pipes and medium pressure work.

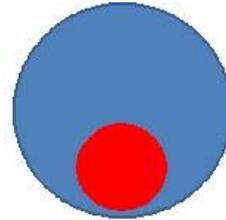

DEAD END SEAL

For sealing the annulus on 'dead' gas mains. Prevents re-instatement 'slump'

Central Dead End Seal – used when the PE is passing through the host pipe centrally.

Offset Dead End Seal – used when the PE is passing through the host pipe off centre (to one side, top or bottom).

*Kits are available for sealing pipe up to 1000mm (39") in diameter although larger sizes can be supplied by request

*At time of dead end seal order please specify if you require central or offset cut as per above diagram.

*Please be aware that where annular space is small only central is offered as there is no room to make them offset.

FOAM CAPS

An alternative to mechanical caps.
Foam caps are easy-fit and require little space - for abandoned gas mains and other pipework.
