

Long Reach Band Cutter

The Long Reach Band Cutter is engineered with operator safety as a top priority. This handheld tool is designed specifically for cutting steel restraining straps on pipe coils carried on Steve Vick International trailers.

By allowing the operator to cut from a minimum distance of 3 metres, this tool ensures that the task is performed remotely, keeping the operator safely outside the trailer's footprint and away from potential hazards.

The Long Reach Band Cutter combines safety, efficiency, and ease of use in a lightweight, telescopic design, making it the ideal accessory for anyone working with an SVI pipe coil trailer.

The Long Reach Band cutter is available as an optional accessory to the pipe coil trailers.

Features and Benefits

- **Remote Cutting Capability**

The Long Reach Band Cutter enables cutting steel bands on pipe coils from a minimum safe distance of 3 metres. This remote operation is crucial for keeping the operator out of harm's way, especially when working with high-tension steel straps.

FUTURE ENERGY

Features and Benefits

- **Enhanced Safety Design**

The tool is designed to be operated outside the trailer footprint, significantly reducing the risk of injury by ensuring the operator remains at a safe distance from the cutting action.

- **Telescopic Design**

The extendable handle allows the Long Reach Band Cutter to be easily stored when not in use, making it highly portable and convenient for operators who need to move between job sites.

- **User-Friendly Operation**

The Long Reach Band Cutter is straightforward to use, with a lightweight design that minimises operator fatigue. It requires only one hand to operate, allowing for quick and efficient cutting without the need for additional tools or personnel.

- **Durable Construction**

Made from high-quality stainless steel, aluminium, and fiberglass, this tool is built to last in tough working environments. The replaceable cutting jaws and spring return mechanism ensure that it remains effective over time, with minimal maintenance required.

Technical specifications

Material	Stainless steel, aluminium, fiberglass
Handle Type	Extendable
Features	<ul style="list-style-type: none"> • Replaceable cutting jaws • Extendable handle • Spring return for quick succession cutting
Max band thickness	3mm
Max band width	15mm
Length	1.5-3m
Depth	80mm
Weight	2.5Kg
Functions	Steel band cutting
Approval	CE pending
Power source	Manually actuated

About Steve Vick International

We are experts in innovative engineering for trenchless renovation and decommissioning of pipes worldwide.

Since our foundation in 1981, we have been dedicated to delivering cost-saving solutions for damaged, redundant or outdated underground pipe work. We are at the forefront in developing products and techniques across gas, water, nuclear and contract service sectors on a worldwide basis.

We are proud of our reputation for innovative product development, strong technical support and after sales care.
