# About SMARTester (Electronic Manometer)

The SMARTester system is an innovative pressure testing solution designed to create a robust audit trail for test data. Using a highly accurate wireless gas pressure tester, traceable to accredited calibration equipment, each pressure test ensures precision and compliance with the latest policies and procedures. The live test data is captured by the accompanying SMARTester Application (app), which, upon test completion, securely submits the data to the SMARTester cloud-based Portal.

# Key Features

## User-Friendly

The SMARTester system is designed for ease of use and the SMARTester app guides users through approved testing procedures, ensuring effective data capture and compliance.

## Data Enrichment

Alongside live pressure readings SMARTester automatically captures test timestamps and GPS coordinates which are included in the test records. Installers can add photos and additional notes within the app to provide further context to pressure test data.

## Calibration Assurance

Each SMARTester comes with a 12-month on-board calibration certificate. The app verifies the certificate's validity before allowing pressure testing to begin, guaranteeing accuracy.

## Robust

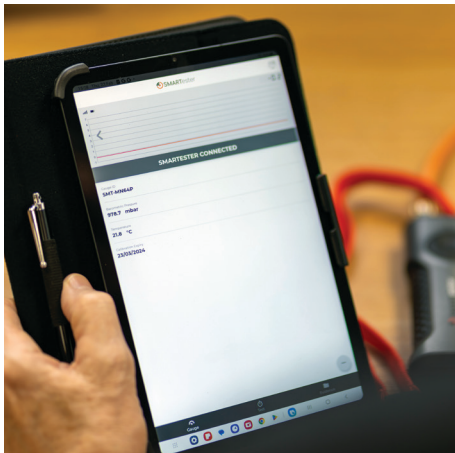

The highly accurate wireless SMARTester is engineered for use in challenging environments and is powered for up to 12 months with just two AA batteries.

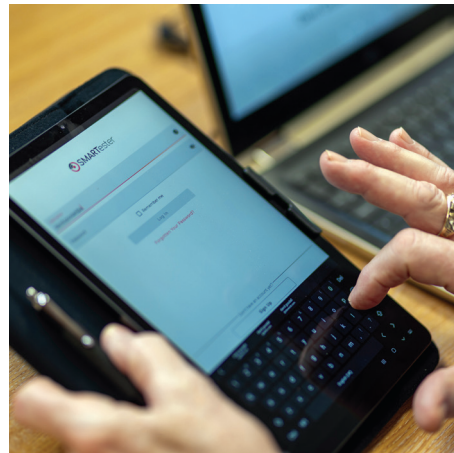

## Business Intelligence

SMARTester empowers companies to convert pressure test results into meaningful business intelligence, driving compliance, enabling informed decision-making, and minimising stand-down times.

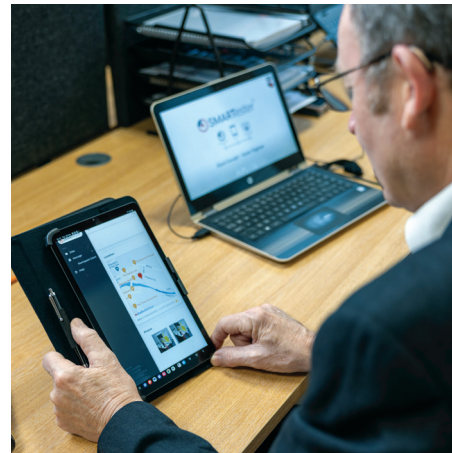

## Real-time Examination

Pressure tests are available for review online in real-time with interactive pressure charts and analytical tools designed to facilitate easy data analysis.

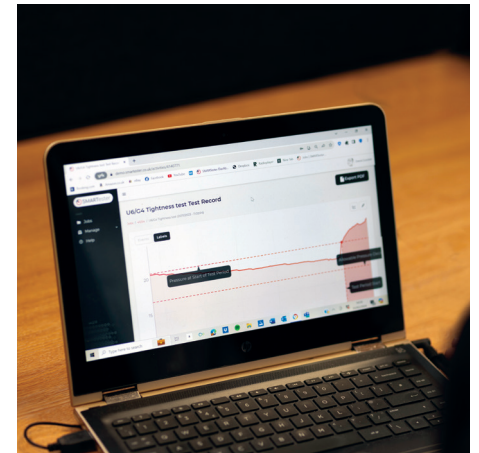

## Consistent Reporting

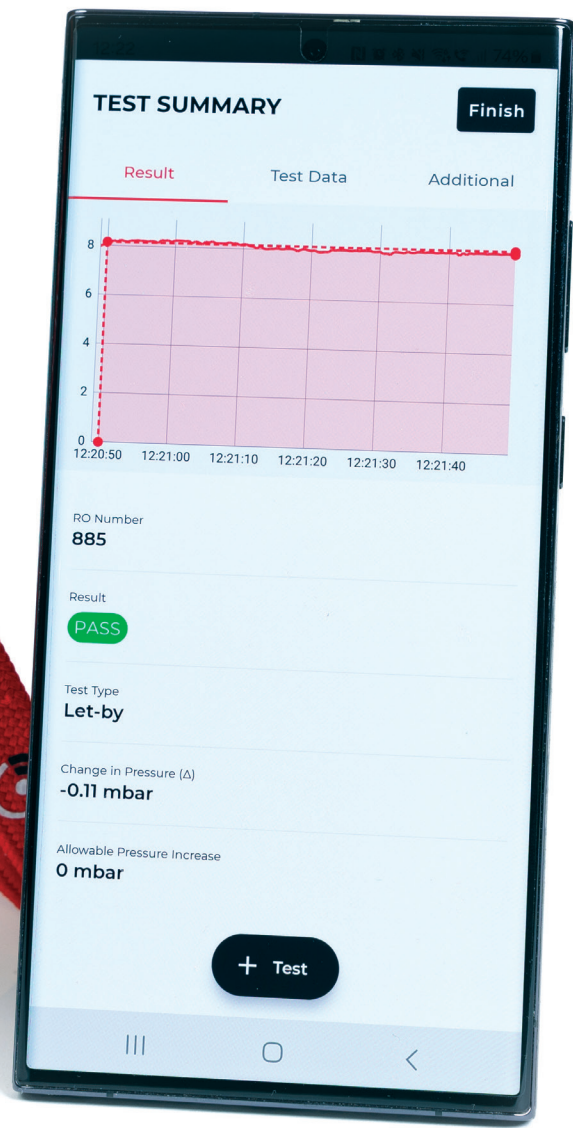

SMARTester eliminates the risks associated with paper-based or multi-platform reporting. The system provides consistent and reliable evidence, reducing investigation times and helping to identify non-compliances with ease.

## Online Portal

The SMARTester Portal provides a searchable database of pressure test data which simplifies data sharing and allows managers to effortlessly generate and download reports.

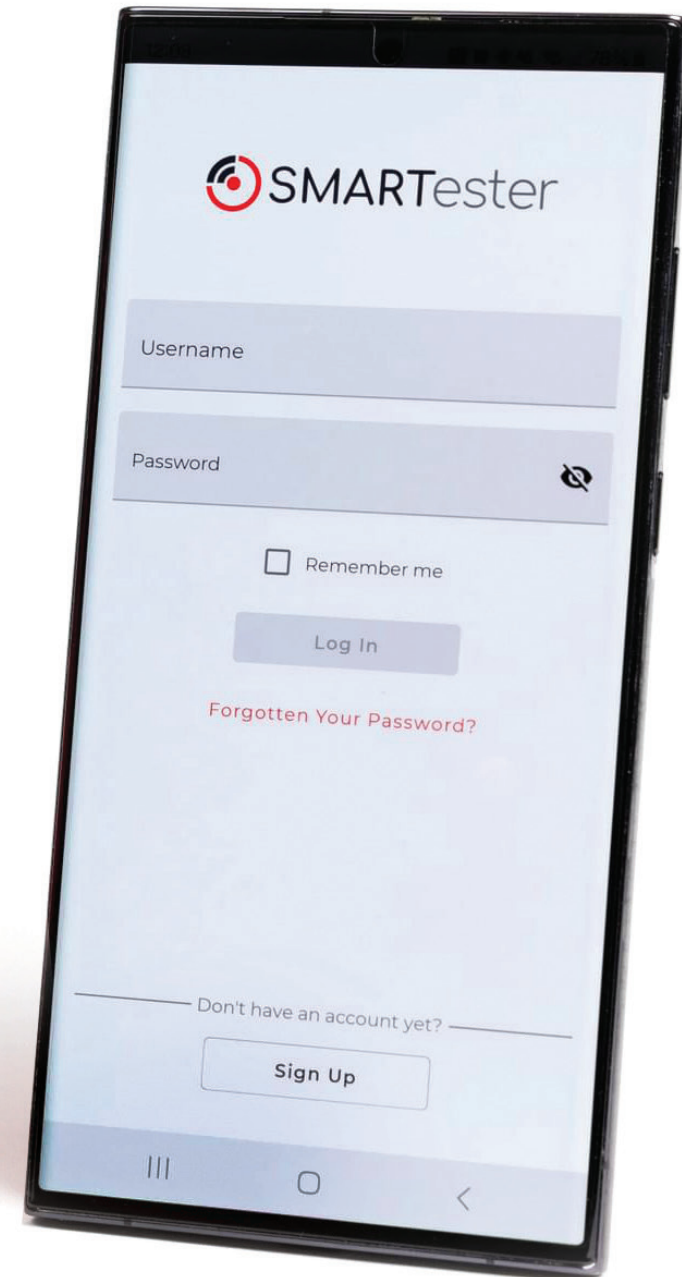

# Features and Benefits – App

Enhance your test operations with the SMARTester app. An intuitive and easy to follow tool that guides users through approved testing procedures. The SMARTester app ensures intelligent data capture, providing real-time access to test data and simplifies demonstrating compliance.

- ▶ Promotes compliance
- ▶ Available on Android and IOS
- ▶ Guides users through approved test policies and procedures
- ▶ Ensures testing policies and procedures are met during the test

# Features and Benefits – Wireless Pressure Tester

The wireless pressure tester delivers assurance that pressure tests are completed to the correct standards. The highly accurate stainless-steel sensor allows users to observe live changes in pressure as small as 0.01 mbar. The onboard calibration certificate ensures automatic compliance, instilling confidence in the accuracy of test results.

- ▶ Assurance that tests are completed to the correct standards
- ▶ Highly accurate stainless-steel sensor
- ▶ Suitable for use with hostile media
- ▶ The ability to register pressure changes as small as 0.01 mbar
- ▶ Onboard calibration certificate for guaranteed compliance

# Features and Benefits – Portal

The SMARTester Portal updates with test evidence instantly and it is fully traceable. Managers can export reports in PDF or .csv/.xls format and investigate detailed pressure tests using detail-rich data with GPS coordinates, timestamps, photos, and notes helping to see the full picture. The SMARTester Portal alleviates the challenges associated with paper documentation.

## Key Portal Features:

- ▶ Instantly available, fully traceable test evidence
- ▶ Consistent and reliable reporting
- ▶ Easily exportable test data records

# Onboarding

**Embracing new technology is a significant journey presenting businesses with unique challenges. However, the SMARTester team is on hand to provide specialist support throughout this transition to help ensure success and to provide assistance at every stage.**

The SMARTester training program is designed to inspire both users and managers to recognise and embrace the benefits offered by SMARTester. A 'Train the Trainer' program is available to help key members of any team develop the skills and knowledge needed to help introduce the SMARTester system to the wider organisation.

Role-specific training materials focus on the ways that people across diverse teams will engage with the SMARTester system in different ways.

# Key Benefits of the SMARTester Training Program

## User Group Identification

Customised training sessions are available tailored to different user groups, including field managers, analysts, trainers, and installers.

## Invitations and Instructions

The SMARTester team can assist with onboarding users for a seamless training experience.

## Comprehensive Training Materials

Users receive step-by-step user guides, troubleshooting techniques, and crucial tips for using SMARTester effectively.

## Ongoing Support

The 'Train the Trainers' program extends beyond initial training. Trainers have the opportunity for refresher sessions and ongoing training support, focusing on refining their skills, addressing questions, and boosting their knowledge.

## Quality Assurance

The SMARTester Support team are always on hand to provide continuous support for users across the SMARTester system. This dedicated team are committed to enabling a seamless operation and ensuring user satisfaction.

## Easily Accessible Support

Users can raise support requests with SMARTester Support by phone, email, and via an online support portal. SMARTester Support offer 1st Line and 2nd Line helpdesk support and can accommodate various communication methods to suit client needs.

## Expert Guidance and Troubleshooting

The SMARTester team are ready to address user questions, troubleshoot issues, and provide expert guidance. Whether navigating through onboarding processes or encountering challenges during operation, the support team is dedicated to ensuring a smooth experience.

## Proactive Support Solutions

Ongoing support is the cornerstone of the SMARTester commitment to user success. The SMARTester team adopt a proactive, forward-thinking approach where data is utilised to anticipate client needs, develop responsive troubleshooting and development practices.

## Tailored Training To Inspire Trust

Recognising the importance of user success, the SMARTester training program offers robust, tailored training materials. The team are on hand to host training sessions which are designed to empower users, fostering a deep understanding of the SMARTester system.

## A Hub For Future-Proof Operations

As the industry evolves and organisational needs change, the service offered by SMARTester adapts. Committed to staying ahead of the curve, SMARTester ensures the support services keep up to date with emerging trends and technologies so that clients can, too.
